

Birds of the Greater Carara Area

More than 230 of the nearly 400 species of birds reported from the area comprising the Carara NP trails, the Río Grande de Tárcoles (from the highway bridge to the mouth) and the associated mangrove estuary, and along the drive to Guacalillo Beach can also be found at Hotel Villa Lapas (including the Sky Walk and the road from the highway up to the Sky Walk entrance). These species are indicated with an asterisk in the list. The following abbreviations are used: C=common, FC=fairly common, U=uncommon, R=rare or accidental. Birds that are highlighted are regional endemics.
